

Virtual Investigation Academy

Overview:

The "Virtual Investigation Academy" is a free, immersive, synchronous experience designed for higher education in the field of forensic science. This advanced educational tool takes students into a hyper-realistic VR police station and crime lab environment where they interact with various forensic equipment under the guidance of a forensics instructor. This VR experience focuses on hands-on learning, critical thinking, and real-time collaboration, making forensic science more accessible and engaging.

How to Find the Experience

Once logged in on the VXRLabs homepage, navigate to the "Subjects" tab, select the "Forensics" option from the left-side menu, then select the "Virtual Investigation Academy" module.

Relevant Standards

Created in Collaboration with Acclaimed Collegiate Forensics Programs.
